

# Everybody Loves Saturday Night

Words & Music:  
Traditional African

*I don't recall where I got the following explanation of this song: "The government of Nigeria put a curfew on its people a number of years ago. When people protested, the government agreed to lift the curfew for Saturday nights only. People went out into the streets and spontaneously created this song as part of the celebrations. The song has been translated into many languages and sung throughout the world."*
